Governance Experience

With significant primary sector and sporting body leadership and governance roles spanning the last 10 years, I currently have director responsibilities in farming, primary sector and business at Corporate and SME level.

This depth of governance experience means I bring the ability to quickly get to grips with organisational objective, understand the culture and values of the organisation as well as their strategic intent and goals.

Working with senior business leaders to turn these goals into actionable plans, and creating accountability processes so that governance bodies are getting clear reports that track progress is part of what I bring.

It is important to me that good governance actually results in improved organisational performance.

Candidate Statement

I am passionate that there isn't a one-size fits all for governance and that businesses have governance models that are 'fit for them' and not something they 'think they should have' or are 'told they should have.'

I am all about pragmatic governance that recognises that each business is unique. I use my extensive networks to connect people and have a reputation of being skilled at bringing out the best in people.

Remuneration Sought \$2000

(per day)
