## Governance Experience

Current and previous governance experience includes chair roles in professional services governing boards and not for profit organisations; Board roles on Tertiary specialist advisory board and in the education sector; and Managing Director and owner governance roles in a number of small to medium sized businesses.

With governance experience spanning over 15 years and senior management roles for over 30 years I bring to any board a keen understanding of the requirements of governance and senior management, particularly in small to medium sized businesses, but also at a professional industry body level.

This means that I am able to focus on practical solutions for businesses whilst helping Boards focus on strategy and risk, keeping a clear separation between governance and management activities.

## Candidate Statement

I am seeking governance roles where I can support businesses to grow and generate the required returns for all stakeholders.

Businesses I have been involved with typically show strong growth, have looked for diversification opportunities and involve multiple stakeholders where gaining consensus and capturing the strengths and opportunities of the people within the business have been key factors in their success.
